TAG is the industry leader in exchange traded index fund (ETF) tactical money management. The founders of TAG began their *Proactive Investment Management* style for "fixed income" investments in 1988. Changing interest rate, credit and economic environments can materially affect the "principal value" of fixed income securities. TAG's "total return" approach sought to capture the value added from fixed income principal changes. Today, TAG applies their proactive investment management process across 29 asset classes globally in their three *ETF Portfolios*. TAG's Portfolios are built exclusively with asset class specific, exchange traded index funds (ETF's) to capture the full impact of their tactical allocation decisions.
